THANK YOU

Thanks to everyone who participated in this year's District meetings in Providence, Rhode Island; Coeur d'Alene, Idaho; and Fort Walton Beach, Florida. It was a pleasure to meet with all of you. Special thanks to the Rhode Island and Idaho Chiropractic Associations for their contributions. Also, thanks to Dr. Craig Little of the CCE and the various district representatives of the NBCE.

DISTRICT MEETING UPDATE

This year's FCLB regional meeting focused on many challenges currently facing regulators, including standard of care issues, jurisdictional borders, and the importance of flexibility.

As in past years, the roundtable discussions sparked the greatest collaboration. Some of the hot issues we discussed included advertising, educational boundaries, and healthcare reform.

Of great interest were discussions about the FTC/Supreme Court decision. Many boards are waiting to find out how this decision will affect board operations. We'll keep you updated.

Deceptive trade practice continues to be a big issue for all of our boards. How do boards educate licensees about appropriate advertising claims, and how do we monitor and enforce these ethics?

As we discussed at the meeting, I encourage all of our boards to take a close look at their regulations and make whatever changes are necessary to keep them current for licensees and the public. Educational requirements are of special concern as many boards have language that is no longer relevant.

Join us in Phoenix to
celebrate 90 years

Voting Delegate &
Alternate Designation

In FCLB news, the PACE program is growing, adding new services and flexibility for users. If your board currently accepts PACE, please consider asking your staff to add a link to your website. Helping licensees find quality CE can streamline your processes significantly.

Additionally, we now have online access to CE reports for any licensees who've taken a PACE course. When it's time to audit your licensee's continuing education, chiropractors with PACE credits can simply click to send an email report directly to your board. No more paper tsunamis!

CCCA

Another service available to your board is the Certified Chiropractic Clinical Assistant (CCCA) program. As more boards look at patient safety and chiropractic assistants, the need for uniform standards is increasing. Like all of our programs and services, the CCCA is designed so you don't have to reinvent the wheel. If you are considering language to regulate chiropractic assistants, please contact us to learn how this program might help your board.

Should you wish further information about this or any of the FCLB meetings, you may always contact our board via e-mail. You can also view the minutes of all our FCLB board meetings online.
